Into America's WILD

The Search for the Hidden Wonders of Nature

Available February 2020

In the spirit of the hit film *National Parks Adventure* comes *Into America's Wild*, a new adventure into the hidden wonders of the natural world. The film follows Native American astronaut John Herrington and Alaskan pilot Ariel Tweto who share a passion to inspire the next generation to connect with nature and seek new experiences in the great outdoors. Their journey leads them to the scenic byways, ancient homelands, little-known gems and hidden trails that form the natural tapestry of America. From kayaking Oregon's stunning coast to the ancient canyons of the Southwest, from the wilds of Alaska to the Appalachian Trail, *Into America's Wild* will connect audiences to the trailblazer in all of us and show that nature is the best classroom of all.

Into America's Wild is a MacGillivray Freeman film produced in association with Brand USA and presented by Expedia and United Airlines.
